

iTravel SD Radio

self powered

MW / FM digital radio

Plays mp3 from SD card

Great sound anywhere

Multi-mode torch light

Compact palm-sized

Ventus induction generator

Emergency phone charge

Tough, impact resistant

Splash proof design

USB recharge from PC

Recycled packaging

SPECIFICATIONS	
Product Code	VIP7392
Radio with Digital Tuning	FM 87 - 108Mhz / MW 520 - 1710KHz
Audio play from SD card	Mp3 / wma / ogg
LCD Display	With auto backlight
3 x LED multi-mode flashlight	Bright white x2 / Red night-reader
SD Compatibility	SD / SDHC up to 16Gb
USB data port	USB 2.0
Play time per minute winding	Approx 25 minutes
Play time from full charge	Approx 16 hours
Recharge by USB	3 - 5 Hours
Generator	Ventus Induction 600 mA
Internal battery	700mAh 3.7v Lithium Ion
USB charge cable	Included
Phone charge cable	Included (with Nokia plug)
Certificated	CE / ROHS / WEEE
Dimensions	130 x 77 x 50 mm (approx)

iTravel SD Radio

What is the VENTUS Difference?

(Compared to budget windups)

- **Double the power, half the winding up effort!**

New contact-less generator technology using Neodymium magnets offers DOUBLE the power output compared with budget brands. That means longer run time for less effort. (ie 30 minutes sound for 1 minute winding, compared to typical 10 - 15 minutes).

- **Vastly brighter light!**

The use of more expensive InGaN LED's ensures Super Bright performance with minimal power consumption. More than FIVE TIMES the light output compared with many budget models. Instantly see the difference!

- **Longer run time!**

The use of higher capacity Lithium internal batteries ensure superior duration. For example, iTravel plays for **SIXTEEN HOURS**, provides over FIVE HOURS of constant light, compared with typical budget performances of around 20 minutes!

- **Greater convenience!**

Features USB socket for convenient full cycle charging from any PC or Laptop. Provides easy access to full battery capacity.

Features Mobile Phone Charger (Nokia Connector)

Features stereo 3.5mm headphone socket for personal use.

iTravel SD Radio self-powered radio with mp3 play facility

- **Environmental Care!**

All products are Retail Packaged in eye-catching, but eco-friendly formats. No more clamshells or full blisters! Just good, simple cartons made from recycled pulp with the minimum possible, but recyclable, plastic windows.

- **Built to last!**

Designed for total Customer Satisfaction. For example:-
> Rugged rubberised finish to all surfaces to ensure a firm and comfortable grip.

> High quality LED lamps tested to over 100,000 hours lifecycle.

> Advanced contact-less generator system has only ONE moving part, and NO wearable components, thus ensuring extremely rugged and durable lifecycle.

> Made to last! Thick and solid body made from impact resistant and fully recyclable ABS, Winding Handle made from glass fibre reinforced Nylon. Inter-meshing generator gears manufactured from dissimilar polymers provide long life and smooth operation.

ADVANCED CONTACTLESS 3-PHASE GENERATOR PROVIDES DOUBLE THE SHINE-TIME PER MINUTE OF WINDING

INDUSTRIAL GRADE COMPONENTS THROUGHOUT - ENSURE LONG AND HIGHLY RELIABLE SERVICE LIFE
